

# The Village-Builder Worksheet

This worksheet is designed to help you, your friends and neighbours to think about your [village-in-the-city](#), find what's already working and start to get you moving on some next steps to building your village.

For each aspect of a village-in-the-city you will find a scale from 1-10. In each case, 10 means you are doing very well indeed, and 1 means there is nothing happening at all in this area. You will almost certainly be somewhere in between. Ask yourselves:

**“Where are we, on this scale, between 1 and 10 right now?”**

Then, pick an aspect and ask yourselves:

**“How come we are at a [your number] and not lower? What are we already doing? What's already happening? What do we already have? What else?”** (Build up as long a list as you can). Then ask:

**“What small steps can we take, to start to move up the scale?”**
